HB2684 Revised Uniform Anatomical Gift Act (UAGA).

Chief Patron: Jeffrey M. Frederick

Summary:

Revised Uniform Anatomical Gift Act (UAGA). Replaces current provisions in the Virginia Code with this Act, which was adopted, in substantial part, by the National Conference of Commissioners on Uniform State Laws (NCCUSL) in July of 2006. The original UAGA was promulgated by NCCUSL in 1968 and enacted by all states. In 1987, the UAGA was revised and updated, but only Virginia and 25 other states adopted that version. Since 1987, many states have adopted nonuniform amendments to their anatomical gift acts. This Act clarifies current law in Virginia, addresses the lack of uniformity among states, and brings the law into harmony with federal laws applicable to organ, tissue and eye donation.

The revised Act addresses each step in the donation process and establishes rules of decision to resolve uncertainties and ambiguities that have arisen under prior versions of the UAGA. It ensures that if an individual wishes to make an anatomical gift or to refuse to make such a gift, those wishes will be respected without exception. It preserves the right of other persons to make an anatomical gift if the decedent did not make a gift during life, and clarifies how, to whom, and for what purpose, the gift may be made. The Act facilitates donation by expanding the list of persons who can make an anatomical gift and by establishing the priority and circumstances under which such persons may make a gift, including when they will be considered available to exercise their right to consent to, or refuse, an anatomical gift. There are numerous default rules for the interpretation of a document of gift that lacks specificity. The Act affirms that procurement organizations will have access to documents of gift in donor registries, medical records, and DMV records. It also provides that taking measures to preserve the viability of organs, tissues and eyes for their donative purpose is not inconsistent with a health-care directive requesting the withholding or withdrawal of life support systems. Other provisions address the relationship between the medical examiner and procurement organizations to ensure, to the maximum extent possible, that anatomical gifts are made from decedents under the jurisdiction of the medical examiner. The revised Act creates a new crime of falsification of a gift document and continues to prohibit the sale of bodies or body parts and increases the criminal penalty from a Class 6 to a Class 4 felony.

Requires a sex offender to include in the registration information any electronic mail address and any instant messaging screen name that he uses or will use. A sex offender must register any changes in email addresses, instant message, or other identity information within 30 minutes of such information changing. The bill defines child pornography as sexually explicit visual material which utilizes or has as a subject a person less than 18 years of age. The bill establishes enhanced penalties for the production, distribution, solicitation, participation, financing, or photographing of child pornography. The bill also clarifies that, for purposes of punishing production, child pornography means sexually explicit visual material that uses an identifiable minor, and that for purposes of punishing possession or reproduction, a person depicted by text or title or who appears to be less than 18 years of age in sexually explicit material is inferred to be less than 18 years of age. The bill repeals 18.2-374.1:2 but inserts similar language in 18.2-374.1:1 relating to facilitating payment for or access to child pornography. This bill is identical to SB 1071.

HB2954 **Public uses; eminent domain.**

Chief Patron: Robert B. Bell

Summary:

Public uses; eminent domain. Defines the term "public uses" as embracing only the acquisition of property where (i) the land is taken for the possession, occupation and enjoyment by the public or a public corporation; (ii) the land is taken for construction, maintenance and operation of public facilities by public corporations or by private entities provided that there is a written agreement with a public corporation providing for the use of the facility by the public; (iii) the land is taken for the creation or functioning of a public service corporation, public service company, or railroad; (iv) the land is taken for the provision of utility services by a government utility corporation; (v) the land taken is blighted and is taken for the elimination of blight; or (vi) the property is taken in a redevelopment or conservation area that is abandoned or the acquisition is needed to clear title where one of the owners agrees to such acquisition or the acquisition is by agreement of all the owners. The bill also states that property can only be taken when the public interest dominates the private gain and the primary purpose is not private financial gain, private benefit, an increase in tax base or revenues, or an increase in employment, except if the property is taken for the creation or functioning of a public service corporation, public service company, or railroad, or for the provision of authorized utility services by a government utility corporation. The bill defines the terms "blighted property," "government utility corporation," "public corporation," and "public facilities." The bill also provides that a property owner may challenge that a taking is a pretext for an unauthorized use. A former property owner, or his successors, may also request to repurchase the taken property upon the completion or abandonment of the stated public use. The bill does not apply to the forfeiture of property in connection with criminal act or real property that is subject to a certificate of take or deposit recorded prior to July 1, 2007. The bill also does not affect the ability of a redevelopment and housing authority to acquire property under a plan adopted prior to January 1, 2007, until July 1, 2010. The bill also does not prohibit the Norfolk Redevelopment and Housing Authority or the City of Norfolk from acquiring property through the use of eminent domain for the location of a recreational facility, to be owned or operated by a nonprofit entity, that will be open to the public, provided that such acquisitions are instituted prior to July 1, 2010. Status:
03/21/07 Governor: Approved by Governor-Chapter 705 (effective 7/1/07)

HB3068 **Electric utility regulation.**

Chief Patron: Clarke N. Hogan

Summary:
Electric utility regulation. Advances the scheduled expiration of the capped rate period from December 31, 2010, to December 31, 2008, establishes a new mechanism for regulating the rates of investor-owned electric utilities, and limits the ability of most consumers to purchase electric generation service from competing suppliers. The ratemaking procedure requires the State Corporation Commission (SCC) to conduct a rate case for

investor-owned utilities in 2009; thereafter, the SCC will review each utility's rates, terms, and conditions using two 12-month test periods ending December 31, 2010, though the SCC is given discretion to stagger the years in which it conducts such reviews. In these biennial reviews the SCC will determine fair rates of return on common equity for the utility's generation and distribution services, using any methodology it finds consistent with the public interest. However, the return shall not be set: (i) lower than the average of the returns on common equity reported to the Securities and Exchange Commission for the three most recent annual periods by a peer group of a majority of the other vertically-integrated investor-owned electric utilities in the southeastern United States with a Moody's bond rating of at least Baa or (ii) higher than 300 basis points above that average. Increases in the rate of return are capped based on the rate of increases in the Consumer Price Index (CPI). The SCC may increase or decrease the rate of return by a Performance Incentive of up to 100 basis points based on the generating plant performance, customer service, operations and efficiency of a utility. In setting the return on equity, the SCC is required to strive to maintain costs of retail electric energy that are cost competitive with costs of retail electric energy provided by the other peer group investor-owned electric utilities. If the combined rate of return on common equity earned is no more than one half of one percent above or below this rate of return, the return shall not be considered either excessive or insufficient. Each utility may seek rate adjustment clauses to recover (i) costs for transmission services provided by PJM Interconnection under applicable rates, terms and conditions approved by the Federal Energy Regulatory Commission (FERC) and costs of FERC-approved demand response programs; (ii) deferred environmental and reliability costs authorized under prior capped rate rules; (iii) costs of providing incentives for the utility to design and operate fair and effective demand-management, conservation, energy efficiency, and load management programs; (iv) costs of participation in the new renewable energy portfolio standard program; and (v) costs of projects that the SCC finds to be necessary to comply with state or federal environmental laws or regulations applicable to generation facilities used to serve the utility's native load obligations, which costs may include the enhanced rate of return for new base load generation if the project would reduce the need for construction of new generation facilities by enabling the continued operation of existing generation facilities. A utility may also apply a rate adjustment clause for recovery from customers of the costs of (i) a coal-fired generation facility that utilizes Virginia coal and is located in the coalfield region of the Commonwealth, (ii) one or more other generation facilities, or (iii) one or more major unit modifications of generation facilities, to meet the utility's projected native load obligations. The utility may recover an enhanced rate of return on common equity associated with the type of project, which may include projects utilizing nuclear power, renewable technologies, carbon capture facilities, combined cycle combustion turbines, and conventional coal facilities. The period over which the enhanced rate of return may be collected depends on the type of facility, as determined by the SCC within specified ranges. The SCC's final order on any petition filed for any of the rate adjustment clauses shall be entered within a specified period after the filing of the petition, and any rate increase required by the clause shall go into effect within 60 days or upon the end of capped rates, whichever is later. The SCC is required to consider petitions for rate adjustment clauses on a stand-alone basis, without regard to the other costs or revenues of the utility. The enhanced returns are subject to revocation if permits are not applied for or construction is not commenced by specified dates. If the SCC determines in a biennial review that a utility underearned by at least 50 basis points on its generation and distribution services, excluding provisions for new generation facilities, the SCC is required to increase the utility's rates to a level necessary to provide the opportunity to fully recover the costs of providing the utility's services and to earn such fair rate of return. If the SCC determines in a biennial review that a utility earned more than 50 basis points above a fair combined rate of return on its generation and distribution services, excluding provisions for new generation facilities, the SCC is required to direct that 60 percent of such overearnings be credited to customers' bills over a period of between 6 and 12 months, to be determined by the SCC. In addition, if the SCC determines that the utility's earnings exceed this limit for two consecutive biennial review periods, it shall also order reductions to the utility's rates, provided that rates may not be reduced to levels below what would provide the utility with the opportunity to fully recover its costs and to earn a fair combined rate of return on its generation and distribution services, excluding provisions for new

generation facilities. If the Commission determines that and the utility's total aggregate regulated rates would exceed the annual increases in CPI, when compared to the utility's rates as determined in the biennial review for a base period (either the utility's first test period or the most recent test period for which credits are applied to customers' bills), the Commission shall direct, unless such action would not be in the public interest, that any or all of such overearnings be credited to customers' bills. An electric utility that demonstrates that it has a reasonable expectation of achieving 12 percent of its base year electric energy sales from certain renewable energy sources during calendar year 2022 may participate in a renewable energy portfolio standard program. Under the program, a participating utility that meets specified percentage goals for sales of eligible renewable energy is eligible for a Performance Incentive that increases the fair combined rate of return on common equity for the utility by a 50 basis points through the third succeeding biennial review if it continues to meet the RPS Goals. It is also entitled to an enhanced rate of return on the costs associated with the construction of renewable energy generation facilities used to provide the renewable energy. Participating utilities may recover their incremental costs of meeting the RPS Goals from customers other than large industrial customers purchasing electricity at large general service rates and at primary or transmission voltage. Double credits will be provided for energy from solar or wind sources. Specific provisions address the use of certain wood products for projects qualifying to meet the renewable energy goals. With regard to the ability of customers to purchase generation services from competing providers, the measure provides that after the capped rate period ends, only customers whose annual demand exceeds five megawatts will be permitted to shop. SB781 Public uses; eminent domain.

Chief Patron: Ken T. Cuccinelli, II

Summary:

Public uses; eminent domain. Defines the term "public uses" as embracing only the acquisition of property where (i) the land is taken for the possession, occupation and enjoyment by the public or a public corporation; (ii) the land is taken for construction, maintenance and operation of public facilities by public corporations or by private entities provided that there is a written agreement with a public corporation providing for the use of the facility by the public; (iii) the land is taken for the creation or functioning of a public service corporation, public service company, or railroad; (iv) the land is taken for the provision of utility services by a government utility corporation; (v) the land taken is blighted and is taken for the elimination of blight; or (vi) the property is taken in a redevelopment or conservation area that is abandoned or the acquisition is needed to clear title where one of the owners agrees to such acquisition or the acquisition is by agreement of all the owners. The bill also states that property can only be taken when the public interest dominates the private gain and the primary purpose is not private financial gain, private benefit, an increase in tax base or revenues, or an increase in employment, except if the property is taken for the creation or functioning of a public service corporation, public service company, or railroad, or for the provision of authorized utility services by a government utility corporation. The bill defines the terms "blighted property," "government utility corporation," "public corporation," and "public facilities." The bill also provides that a property owner may challenge that a taking is a pretext for an unauthorized use. A former property owner, or his

successors, may also request to repurchase the taken property upon the completion or abandonment of the stated public use. The bill does not apply to the forfeiture of property in connection with criminal act or real property that is subject to a certificate of take or deposit recorded prior to July 1, 2007. The bill also does not affect the ability of a redevelopment and housing authority to acquire property under a plan adopted prior to January 1, 2007, until July 1, 2010. The bill also does not prohibit the Norfolk Redevelopment and Housing Authority or the City of Norfolk from acquiring property through the use of eminent domain for the location of a recreational facility, to be owned or operated by a nonprofit entity, that will be open to the public, provided that such acquisitions are instituted prior to July 1, 2010. SB918 **Revised Uniform Anatomical Gift Act (UAGA).**

Chief Patron: Janet D. Howell

Summary:

Revised Uniform Anatomical Gift Act (UAGA). Replaces current provisions in the Virginia Code with this Act, which was adopted, in substantial part, by the National Conference of Commissioners on Uniform State Laws (NCCUSL) in July of 2006. The original UAGA was promulgated by NCCUSL in 1968 and enacted by all states. In 1987, the UAGA was revised and updated, but only Virginia and 25 other states adopted that version. Since 1987, many states have adopted nonuniform amendments to their anatomical gift acts. This Act clarifies current law in Virginia, addresses the lack of uniformity among states, and brings the law into harmony with federal laws applicable to organ, tissue and eye donation.

The revised Act addresses each step in the donation process and establishes rules of decision to resolve uncertainties and ambiguities that have arisen under prior versions of the UAGA. It ensures that if an individual wishes to make an anatomical gift or to refuse to make such a gift, those wishes will be respected without exception. It preserves the right of other persons to make an anatomical gift if the decedent did not make a gift during life, and clarifies how, to whom, and for what purpose, the gift may be made. The Act facilitates donation by expanding the list of persons who can make an anatomical gift and by establishing the priority and circumstances under which such persons may make a gift, including when they will be considered available to exercise their right to consent to, or refuse, an anatomical gift. There are numerous default rules for the interpretation of a document of gift that lacks specificity. The Act affirms that procurement organizations will have access to documents of gift in donor registries, medical records, and DMV records. It also provides that taking measures to preserve the viability of organs, tissues and eyes for their donative purpose is not inconsistent with a health-care directive requesting the withholding or withdrawal of life support systems. Other provisions address the relationship between the medical examiner and procurement organizations to ensure, to the maximum extent possible, that anatomical gifts are made from decedents under the jurisdiction of the medical examiner. The revised Act creates a new crime of falsification of a gift document and continues to prohibit the sale of bodies or body parts and increases the criminal penalty from a Class 6 to a Class 4 felony.

SB1001 Freedom of Information Act; electronic communication meetings.

Chief Patron: R. Edward Houck

Summary:

Freedom of Information Act; electronic communication meetings. Reduces the notice requirement for electronic communication meetings from seven to three working days and clarifies that political subdivisions, other than units of local government, may conduct electronic communication meetings. The bill also allows an individual member of a public body to participate in a meeting through electronic communication means from a remote location that is not open to the public in the event of an emergency, temporary or permanent disability or other medical condition, or when a member of a regional public body's principal residence is more than 60 miles from the primary meeting location. For a member to participate in the above described manner, the bill requires that a quorum of the public body be physically assembled at the primary or central meeting location and that the public body make arrangements for the voice of the remote participant to be heard by all persons at the primary or central meeting location. The bill defines "regional public body." The bill also contains technical amendments and is a recommendation of the Virginia Freedom of Information Advisory Council.

Law Advice: Change in Requirement

Report required by annually by December 15 to the Virginia Freedom of Information Council and the Joint Commission on Technology and Science if conduct meetings by electronic communication.

SB1003 **Freedom of Information Act; venue for enforcement actions.**

Chief Patron: R. Edward Houck

Summary:

Freedom of Information Act; venue for enforcement actions. Clarifies that venue for the enforcement of FOIA rights and privileges against state public bodies, including state institutions, may be brought in general district court or the circuit court of the residence of the aggrieved party or of the City of Richmond. The bill addresses a recent Supreme Court of Virginia case of *William F. Shaw v. John T. Casteen, et al*, where the Supreme Court upheld the trial court's decision that a FOIA action against the University of Virginia could not be brought where the aggrieved party lived. The bill contains technical amendments and is a recommendation of the Virginia Freedom of Information Advisory Council.

Chief Patron: John S. Edwards

Summary:

Classification of real property; energy-efficient buildings. Permits localities to tax certain energy-efficient buildings, not including the land on which they are located, at a lower tax rate than that imposed on the general class of real property by creating a separate classification for taxation purposes. An energy-efficient building is any building that exceeds the energy efficiency standards prescribed in the Virginia Uniform Statewide Building Code by 30 percent. Energy-efficient building certification shall be determined by any qualified licensed engineer or contractor who is not related to the taxpayer and who shall certify to the taxpayer that he has qualifications to provide the certification.

Chief Patron: Ryan T. McDougle

Summary:

Sex offender registration; child pornography; penalties. Requires a sex offender to include in the registration information any electronic mail address and any instant messaging screen name that he uses or will use. A sex offender must register any changes in email addresses, instant message, or other identity information within 30 minutes of such information changing. The bill defines child pornography as sexually explicit visual material which utilizes or has as a subject a person less than 18 years of age. The bill establishes enhanced penalties for the production, distribution, solicitation, participation, financing, or photographing of child pornography. The bill also clarifies that, for purposes of punishing production, child pornography means sexually explicit visual material that uses an identifiable minor, and that for purposes of punishing possession or reproduction, a person depicted by text or title or who appears to be less than 18 years of age in sexually explicit material is inferred to be less than 18 years of age. The bill repeals 18.2-374.1:2 but inserts similar language in 18.2-374.1:1 relating to facilitating payment for or access to child pornography. This bill is identical to HB 2749.

SB1296 Public uses; eminent domain.

Chief Patron: Thomas K. Norment, Jr.

Summary:

Public uses; eminent domain. Defines the term "public uses" as embracing only the acquisition of property where (i) the land is taken for the possession, occupation and enjoyment by the public or a public corporation; (ii) the land is taken for construction, maintenance and operation of public facilities by public corporations or by private entities provided that there is a written agreement with a public corporation providing for the use of the facility by the public; (iii) the land is taken for the creation or functioning of a public service corporation, public service company, or railroad; (iv) the land is taken for the provision of utility services by a government utility corporation; (v) the land taken is blighted and is taken for the elimination of blight; or (vi) the property is taken in a redevelopment or conservation area that is abandoned or the acquisition is needed to clear title where one of the owners agrees to such acquisition or the acquisition is by agreement of all the owners. The bill also states that property can only be taken when the public interest dominates the private gain and the primary purpose is not private financial gain, private benefit, an increase in tax base or revenues, or an increase in employment, except if the property is taken for the creation or functioning of a public service corporation, public service company, or railroad, or for the provision of authorized utility services by a government utility corporation. The bill defines the terms "blighted property," "government utility corporation," "public corporation," and "public facilities." The bill also provides that a property owner may challenge that a taking is a pretext for an unauthorized use. A former property owner, or his successors, may also request to repurchase the taken property upon the completion or abandonment of the stated public use. The bill does not apply to the forfeiture of property in connection with criminal act or real property that is subject to a certificate of take or deposit recorded prior to July 1, 2007. The bill also does not affect the ability of a redevelopment and housing authority to acquire property under a plan adopted prior to January 1, 2007, until July 1, 2010. The bill also does not prohibit the Norfolk Redevelopment and Housing Authority or the City of Norfolk from acquiring property through the use of eminent domain for the location of a recreational facility, to be owned or operated by a nonprofit entity, that will be open to the public, provided that such acquisitions are instituted prior to July 1, 2010. SB1416 **Electric utility regulation.**

Chief Patron: Thomas K. Norment, Jr.

Summary:

Electric utility regulation. Advances the scheduled expiration of the capped rate period from December 31, 2010, to December 31, 2008, establishes a new mechanism for regulating the rates of investor-owned electric utilities, and limits the ability of most consumers to purchase electric generation service from competing suppliers. The ratemaking procedure requires the State Corporation Commission (SCC) to conduct a rate case for investor-owned utilities in 2009; thereafter, the SCC will review each utility's rates, terms, and conditions using two 12-month test periods ending December 31, 2010, though the SCC is given discretion to stagger the years in which it conducts such reviews. In these biennial reviews the SCC will determine fair rates of return on common equity for the utility's generation and distribution services, using any methodology it finds consistent with the public interest. However, the return shall not be set: (i) lower than the average of the returns on common equity reported to the Securities and Exchange Commission for the three most recent annual periods by a peer group of a majority of the other vertically-integrated investor-owned electric utilities in the southeastern United States with a Moody's bond rating of at least Baa or (ii) higher than 300 basis points above that average. Increases in the rate of return

are capped based on the rate of increases in the Consumer Price Index (CPI). The SCC may increase or decrease the rate of return by a Performance Incentive of up to 100 basis points based on the generating plant performance, customer service, operations and efficiency of a utility. In setting the return on equity, the SCC is required to strive to maintain costs of retail electric energy that are cost competitive with costs of retail electric energy provided by the other peer group investor-owned electric utilities. If the combined rate of return on common equity earned is no more than one half of one percent above or below this rate of return, the return shall not be considered either excessive or insufficient. Each utility may seek rate adjustment clauses to recover (i) costs for transmission services provided by PJM Interconnection under applicable rates, terms and conditions approved by the Federal Energy Regulatory Commission (FERC) and costs of FERC-approved demand response programs; (ii) deferred environmental and reliability costs authorized under prior capped rate rules; (iii) costs of providing incentives for the utility to design and operate fair and effective demand-management, conservation, energy efficiency, and load management programs; (iv) costs of participation in the new renewable energy portfolio standard program; and (v) costs of projects that the SCC finds to be necessary to comply with state or federal environmental laws or regulations applicable to generation facilities used to serve the utility's native load obligations, which costs may include the enhanced rate of return for new base load generation if the project would reduce the need for construction of new generation facilities by enabling the continued operation of existing generation facilities. A utility may also apply a rate adjustment clause for recovery from customers of the costs of (i) a coal-fired generation facility that utilizes Virginia coal and is located in the coalfield region of the Commonwealth, (ii) one or more other generation facilities, or (iii) one or more major unit modifications of generation facilities, to meet the utility's projected native load obligations. The utility may recover an enhanced rate of return on common equity associated with the type of project, which may include projects utilizing nuclear power, renewable technologies, carbon capture facilities, combined cycle combustion turbines, and conventional coal facilities. The period over which the enhanced rate of return may be collected depends on the type of facility, as determined by the SCC within specified ranges. The SCC's final order on any petition filed for any of the rate adjustment clauses shall be entered within a specified period after the filing of the petition, and any rate increase required by the clause shall go into effect within 60 days or upon the end of capped rates, whichever is later. The SCC is required to consider petitions for rate adjustment clauses on a stand-alone basis, without regard to the other costs or revenues of the utility. The enhanced returns are subject to revocation if permits are not applied for or construction is not commenced by specified dates. If the SCC determines in a biennial review that a utility underearned by at least 50 basis points on its generation and distribution services, excluding provisions for new generation facilities, the SCC is required to increase the utility's rates to a level necessary to provide the opportunity to fully recover the costs of providing the utility's services and to earn such fair rate of return. If the SCC determines in a biennial review that a utility earned more than 50 basis points above a fair combined rate of return on its generation and distribution services, excluding provisions for new generation facilities, the SCC is required to direct that 60 percent of such overearnings be credited to customers' bills over a period of between 6 and 12 months, to be determined by the SCC. In addition, if the SCC determines that the utility's earnings exceed this limit for two consecutive biennial review periods, it shall also order reductions to the utility's rates, provided that rates may not be reduced to levels below what would provide the utility with the opportunity to fully recover its costs and to earn a fair combined rate of return on its generation and distribution services, excluding provisions for new generation facilities. If the Commission determines that and the utility's total aggregate regulated rates would exceed the annual increases in CPI, when compared to the utility's rates as determined in the biennial review for a base period (either the utility's first test period or the most recent test period for which credits are applied to customers' bills), the Commission shall direct, unless such action would not be in the public interest, that any or all of such overearnings be credited to customers' bills. An electric utility that demonstrates that it has a reasonable expectation of achieving 12 percent of its base year electric energy sales from certain renewable energy sources during calendar year 2022 may participate in a renewable energy portfolio standard program. Under the program, a participating utility that meets specified percentage goals for sales of eligible renewable energy is eligible for a

Performance Incentive that increases the fair combined rate of return on common equity for the utility by a 50 basis points through the third succeeding biennial review if it continues to meet the RPS Goals. It is also entitled to an enhanced rate of return on the costs associated with the construction of renewable energy generation facilities used to provide the renewable energy. Participating utilities may recover their incremental costs of meeting the RPS Goals from customers other than large industrial customers purchasing electricity at large general service rates and at primary or transmission voltage. Double credits will be provided for energy from solar or wind sources. Specific provisions address the use of certain wood products for projects qualifying to meet the renewable energy goals. With regard to the ability of customers to purchase generation services from competing providers, the measure provides that after the capped rate period ends, only customers whose annual demand exceeds five megawatts will be permitted to shop.
